TREVOR COWIE and ALISON REID

BRONZE-AGE METALWORK FROM PERTHSHIRE

T COWIE & A REID

CONTENTS

List of Bronze-Age metalwork in Perth Museum
and Art Gallery

A5-13

Appendix

List of bronze age metalwork in Perth Museum and Art Gallery

Notes:

1. Abbreviations: SB = Schmidt and Burgess 1981 Corpus
no
PMAG = Perth Museum and Art Gallery
accession no
2. In a number of cases, no details of the provenance of an object are available: these are therefore listed here as having 'no locality' (cf Anderson and Black 1888) although previous writers have tentatively attributed some to '? Perthshire' or '? Scotland'.
3. A number of the items referred to by Anderson and Black (*ibid*, 337-38) are described in insufficient detail to allow them to be matched up with objects in the present collection.
4. Accession numbers: in some cases, an object has two accession numbers eg 120 (1305), reflecting changes in the museum's cataloguing system in the past. As earlier publications may refer to only one of these, both are shown here for ease of future reference. The prefix K, before an accession number denotes an item in the collections of the Kinross Museum, responsibility for the care of which was transferred to Perth and Kinross District Museum Service in 1975.

Early Bronze Age

Flat axes

No locality

- Coles 1969,86 (= ? Perthshire); SB 84 (= ? Scotland)
- PMAG 121 (1301)

Baldowie Farm, Newtyle, Angus
