

# INDEX

## Note for users of this Index

Authors are cited in the Index with page references only and a brief indication of the subject. F indicates a microfiche in the envelope at the back of this volume. Places within Britain and Ireland are indexed, variously, under old historical counties or local council areas; other places under name, district and country. Single citations of find spots or archaeological sites (eg as comparanda) have been omitted. Entries under pottery are listed chronologically, then alphabetically (thus, various sorts of medieval pottery will follow Romano-British pottery).
